Subject: Microsoft Settlement

Honorable Judge Kollar-Kotally,

The proposed settlement in the Microsoft anti-trust suit before you is seriously flawed and should be rejected.

Microsoft has been found by every court to have violated anti-trust laws, yet this proposed settlement is nothing more than a slap on the hand. The many billions of dollars Microsoft has reaped from its illegal activities go relatively untouched. Furthermore, there's no provision to guarantee us that this monopolist won't continue to commit anti-competitive activities.

Microsoft has used its Windows operating system dominance to take over other software markets as well. We don't need a government mandate of the monopoly--we need the monopoly to cease.

Respectfully submitted,

Ron Sackman
